Funky Monkey slot game by Playtech screenshot

Funky Monkey slot game by Playtech is an interesting slot machine game with a payout structure for three-in-a-row combinations. All the 7 symbols are paying for three-of-a-kind. Plus, the combination of 3Bar, 2Bar, and 1Bar will also result in pay.

The return to player (RTP) is set as 96.94% and here in my simulation using my slot machine calculator, I made a symbol distribution in order to get as close as possible. My simulation shows 96.49% as RTP.

Just like other slot machines, I noticed the symbols alternating the reels with one reel with a high quantity of the same symbol and the other two with only 1 or 2. Then the next symbol start with 1 or 2 and uses a higher quantity on the next reel. And so on, in a way that the game will never get enough same symbols to form a big win combination.

The payout potential, though, of 2,500 makes every spin worth. You can print this report and play the free demo version of Funky Monkey slot game by Playtech to test if all this information makes sense. Thanks for reading!
