Introduction

Video Poker have rich history, this game has been around since the middle of the 1970's (when personal computers started to hit the scene), those versions would be considered EXTREMELY basic compared to what is on offer today.

As the years passed and the games progressed, it became a popular option even in brick and mortar based gambling establishments.

Whereas some people might be too intimidated to compete with more veteran players at the card table, the machines offered a more anonymous way of participating and allowed many the opportunity to learn the ins and outs of the game without the anxiety tied into the table and other players.

You can play free video poker games with no registration and no deposit required. Visit my free video poker games here:

How to Play Video Poker

One concern that people had over the years when playing Video Poker was that since it was computer based, they could be easily taken advantage of with regards to card sequences and random card drawing.

For that reason, the machines are now tested and checked to ensure they comply with regulatory standards in accordance with regulations imposed on the entire industry. Heck, it's no fun gambling if you can't win, right?

So how exactly do these machines work? Well, when it comes to the online casino version, the first thing you need to do is set the value of the coins or credits you'll be betting.

Many casino games offer a vast range from single pennies and up to 100 times that amount.

That means that whether you start out in our free play mode where there's no chance you'll lose a cent of your own bankroll or whether you start out just betting pennies, you have a chance to really learn the fine points of the game before you have to worry about your finances.

Then, once you've set the value of the credits, you have to choose how many of them you'd like to bet (anywhere from one to five) and make sure to review the payable because that's how you'll know which hands are worth going for over others and how much you stand to win based on the amount you've bet.

At this point - you are now ready to deal the cards OR you can read the additional info about video poker rules.

Video Poker Tips For The Win

When it comes down to it, many will say that cards are a game entirely based on chance and the odds of winning are equal to the odds of losing.

The many poker championships and people who base their livelihood on high stakes

poker games will probably choose to differ.

For starters, the very obvious instruction would be to always hold cards that contribute to a winning hand. Meaning, if you have a straight, a royal flush or even two or three of a kind or two pairs, hold on to whatever cards may be worth something.

You can toss the one to three cards left for a chance at something better, but never get rid of a sure thing.

The only time it is ever suggested to throw a card out from a hand holding a flush or a straight, though, is if you have four cards towards a royal flush and are feeling particularly lucky.

These basic tips and some others like it will contribute to you mastering the art of leaving the table ahead of the game but when it comes down to it, it's really all about the law of large numbers (i.e. the more you play, the more you can win) - so tell us, what exactly are you waiting for...?

The Predecessor of Videopoker

Videopoker history is long and colourful. The predecessor of videopoker is the first slot like machine that was created by Sittman and Pitt in 1891. This machine consisted of five drums each containing ten different playing cards.

Players inserted a coin and pulled a lever to spin the drums. When they came a stop, they revealed a five card poker hand. The ten of spades and Jack of hearts were removed to decrease the player's chance of achieving a royal flush.

In 1899, Charles Fey created the father of the modern slot machine. In 1901 he introduced the hold feature that allowed the player to hold certain drums and re-spin the remaining drums.

Videopoker History

In 1970, Dale Electronics introduced the Poker-Matic videopoker machine. These were not immediately popular, however in the 1980s their popularity grew.

Si Redd and his company, Sircoma, made videopoker history when they created the Draw Poker machine in 1979 which featured the lowest possible hand of two pairs. These machines became available in casinos, bars, restaurants, arcades and other venues.

Online Videopoker

Since the mid-1990s, videopoker has grown greatly in popularity. This is due to the increasing speed of internet connections, the increasing availability of computers and the Internet and the development of online casino software.

Online videopoker is a popular game choice at online casinos as it combines two favourite casino games - slots and poker. The videopoker rules are simple and many people find it straightforward.

You can learn how to play videopoker in just a short time. This, coupled with the skill and strategy that is needed to be successful, has made the game

popular with amateurs and professionals alike.

There are multiple variations of the game available, offering something for all videopoker fans.

Learning to Play Videopoker

The rules of the game are fairly simple and straightforward. Once you learn how to play videopoker, you can enjoy hours of fun and entertainment.

With the exciting option to double your wins and the great range of videopoker games that are available at the best online casinos, there is something for all online videopoker fans.

Videopoker Rules

There are a number of different variations of online videopoker, however the aim with all the variations is to achieve the best five card poker hand possible.

Look at the videopoker rules for the specific variation of the game that you are playing as the value of hands may vary and this will affect your strategy.

It is most important to understand the hand ranking for the variation you are playing. General hand rankings in videopoker are as follows (from highest to lowest):

Five of a kind (only possible in games with wild cards)

Royal Flush

Ten, Jack, Queen, King and Ace of the same suit.

Straigh Flush

Five cards in sequence (until King) of the same suit

Four of a kind

Four cards of the same value

Full house

Three of a kind and one pair

Flush

all cards of the same suit, not in sequence.

Straight

five cards in sequence with multiple suits

Three of a kind

Three cards of the same value and different suits

Two pair

Jacks or Better

a single pair of Jacks or higher cards

Pair

Many videopoker games do not pay out for one pair or require that the pair be of a minimum rank, for example in Jacks or Better, you will only be paid out for one pair of Jacks or higher.

Once you have played your hand it will be assessed and you will be paid out any wins according to the pay table that is displayed.

Video Poker Games – Different Versions

10's or Better - Video Poker Game

10's or Better is a variation of online videopoker that is similar to Aces and Faces in that it does not pay out for all pairs, but only pairs ranked higher than a set minimum.

Many players prefer 10's or Better as it pays out for an extra pair – a pair of 10s (as opposed to Aces and Faces whose lowest paying pair is a pair of Jacks).

How to Play 10's or Better

To begin 10's or Better, place your bet by clicking on the Bet One or Bet Max button. Once your bet has been placed, click on the Deal button (if your cards have not been dealt automatically after betting the maximum).

You will be dealt five cards. Click on any cards you want to hold and click again on the Deal button.

The cards you did not hold will be replaced with new cards to create a new five-card poker hand. Your hand will be assessed and you will be paid out for any winnings.

2 Ways Royal - Video Poker Game

Also sometimes referred to as AceyDeucey, 2 Ways Royal is an exciting version of online videopoker that will appeal to anyone who likes aiming for the royal flush.

2 Ways Royal offers a double opportunity to achieve a royal flush – the High Flush (the classic ten through Ace royal flush) and the Low Flush (the Ace through five royal flush).

Players can earn the same payout for each royal flush, but because of this, the payout for other hands may be altered.

How to Play 2 Ways Royal

Place your bets by clicking on the Bet One or Bet Max buttons on your screen. Click on the Deal button and you will be dealt a five card poker hand.

Click on any cards that you want to hold and then click on the Deal button once again. All the cards you did not hold will be replaced by new cards to create a new poker hand. Your poker hand will be assessed and you will be paid out for any wins.

Aces and Faces - Video Poker Game

Aces and Faces is a familiar and popular online videopoker game. As the name suggests, the game places an emphasis on Aces and face cards in that the lowest ranking hand is a pair of Jacks or better, four Aces ranks higher than a straight flush and four Jacks, Queens or Kings ranks higher than four of kind hands made with lower ranking cards.

How to Play Aces and Faces

To begin playing Aces and Faces, place your initial bet and click on the Deal button on your screen.

You will be dealt five cards. Click on the cards you wish to hold and click on the Deal button once again. The cards you did not hold will be replaced by new cards to create a final five card poker hand.

Hand ranks, from highest to lowest include: Royal Flush, four Aces, straight flush, four face cards, four of a kind (with cards 2-10), full house, flush, straight, three of a kind, two pair, one pair of Jacks or better.

25-Line Aces and Faces - Video Poker Game

25-line Aces and Faces is an exciting variation of online videopoker which allows you to play 25 hands all at one time. If you enjoy aiming for the big cards where pairs pay out only for Jacks or better, 25-line Aces and Faces is ideal for you.

How to Play 25-Line Aces and Faces

To begin a game of 25-line Aces and Faces you need to place a bet. Click on Bet One or Bet Max. If you Bet Max, you will automatically be dealt five cards, whereas if you Bet One you will need to click on the Deal button afterwards.

Your screen is divided into two sections. In the bottom section you will have one five-card hand displayed with large cards. In the top section you will have your remaining 24 hands displayed in rows with small cards.

You will need to look at your main hand and decide which cards to hold. Those same cards will be held in all of your hands. Then click on the deal button. The missing cards will be replaced with each hand being dealt from 25 different decks. Each hand will then be assessed individually to determine any winnings.

If you win, you will have the opportunity to gamble to double or half double your winnings. The computer selects one card from five face-down cards and you need to select a different card. If your card ranks higher than the computer's card, your winnings will be doubled or half doubled.

4-Line Aces and Faces Game

With hundreds to thousands of different options available when choosing card games to play at an online casino, actually choosing which game to play is the first risk you'll have to take.

For a simple yet exciting hand of cards, come on over to MansionCasino.com and try your hand at 4-Line Aces and Faces. Whether you win or lose (though obviously the ideal is to win), you'll have an absolute blast! And if you're a bit scared at first to bet your own money, we'll even let you start out by betting with ours!

How to Play 4-Line Aces and Faces Videopoker

As can be understood from the name, in 4-Line Aces and Faces you'll be concentrating on Ace, King, Queen and Jack since they are the minimum pairs needed for a winning hand, meaning that if your only good cards are a pair of deuces or any other number up to 10's, then you're SOL (uhhh - sorry, out of luck).

To start playing, you'll need to first set the value of the coins you'll be betting and don't worry; the range is vast enough to suit the high roller and penny player, alike.

Then you'll have to choose how many coins you'd like to bet on the upcoming round (this can always be changed in between rounds so that you can practice smart money management skills which is the most important aspect of smart gambling) but to keep things going for longer the maximum coins you can bet per round is five.

Now that all of that is set up, you can press "Deal" and start playing. Once you see the cards you've been dealt, you can either hold or discard each of them, though whichever ones you hold on that first line, will be held on each line across the board so make sure you choose wisely.

4-Line Aces and Faces Bonus Game

If you're feeling particularly lucky while playing 4-Line Aces and Faces, there's a mini game within this game that you can play for some extra winnings.

In this bonus game, you have the option to half double, or double your winnings and in order to do that, here's the deal. You're dealt five cards - the first one face up and the rest face down.

You have to choose one of the other four that you think is higher than the face up card and if you beat it, you automatically win! Simple as that!

All American - Video Poker Game

All American is one of the classic online videopoker games available at MansionCasino.com. This popular videopoker choice has a great all-American feel to it and offers fantastic payback percentages if you play a perfect game

How to Play All American

All American videopoker is played with one standard 52-card deck. To begin a game of All American, place your bet by clicking on the bet button on the screen. You can then click on the Deal button and you will be dealt five playing cards.

Click on the cards you want to hold and then click on the Deal button once again. The cards you did not hold will be replaced to form your final five card hand. You will then be paid out for any winnings, according to the pay table.

If you win, you can choose to collect your winnings immediately or to make use of the double gamble feature.

This feature allows you to gamble to double or half double your winnings. The computer will select one face-down card that will be revealed and you will need to select another.

If your card ranks higher than the computer's card, you will double or half double your winnings. If your card ranks lower than the computer's card, you will lose your winnings for that round.

Deuces Wild - Video Poker Game

Deuces Wild is played with a 52-card deck in which the four twos act as wild cards. This makes hitting a winning combination easier and increases the level of the excitement in the game, but at the same time, you have to pay for your advantage. The lowest paying hand in Deuces Wild is three of a kind, meaning that neither single nor double pairs pays out at all.

How to Play Deuces Wild

To begin a game of Deuces Wild, place your bet by clicking on the Bet One or Bet Max button on the screen and then click on the Deal button to see yourself dealt your five card poker hand.

You will be able to hold cards by clicking on the cards you want to hold and will then need to click on the Deal button to have the remaining cards replaced to create a new hand. Your final poker hand will be assessed and you will be paid out for any winnings. Note that three of a kind is the lowest paying hand.

If you win, you will be able to gamble to double or half double your winnings. You and the computer each select a card from five face-down cards. If your card ranks higher than the computer's card, you will double or half double your winnings. If not, you will lose your winnings for that round.

4-Line Deuces Wild - Video Poker Game

4-line Deuces Wild is played with twos that act as wild cards. This makes achieving winning hands easier. However, because of this advantage, payouts are lowered for certain hands and the lowest paying hand is the three of a kind.

Playing four hands in one makes for an exciting online videopoker option and the twos give you more ways to win.

How to Play 4-Line Deuces Wild

To begin 4-line Deuces Wild, click on either the Bet One or Bet Max buttons to set the amount you wish to bet. If you Bet One, then click on the deal button or if you Bet Max, the computer will automatically deal for you. Look at your five-card poker hand and click on the cards you want to hold.

The cards you hold will be displayed as held in all four hands. Then click on the Deal button to replace the missing cards. The hands will be filled to create four individual poker hands which will be evaluated individually.

If you win, you will have the option to gamble to double or half double your winnings. The computer will select one face-down card from five and you will need to select another from the remaining cards.

If your card ranks higher than the computer's card, you will double or half double your winnings. If your card ranks lower than the computer's card, you will lose your winnings for that round.

Jacks or Better Video Poker Game

Jacks or Better is a video poker game offered in this single hand version and is one of the more popular choices available from the extensive collections of casino games at online casinos. As the original style of this game created, it's the first one of its kind and therefore the perfect choice for a beginner to this type of gambling arena.

Jacks or Better Video poker

If you are familiar with basic poker rules then it's only a hop, skip and a jump over to Jacks or Better and understanding what makes it special and how to win.

If, however, you are still concerned about risking your money before you've gotten the hang of the game then there is no need to worry.

We'll let you start playing at no cost with money from our account (though in this case you won't keep the winnings) to get you going and then you can switch over to betting real money whenever you feel like it and start taking home your winnings.

Playing Jacks or Better

The object of this game is to end up with at least two face cards or any combination of cards that would beat a pair of 10's.

Before you can start dealing out the hand, you'll need to decide how much you want each of your chips to be worth and how many of those chips you want to put up for every hand played.

The more you place on the felt, the higher your overall jackpot could turn out to be. Once you are ready, deal the cards. In Jacks or Better, all the cards are dealt face up and this allows you to see what you have and what hands you think you can build from the initial deal.

The next step is to hold the cards you want to keep based on what you think the next cards will be. It is always a good idea to hold onto the face cards, but if you are close to a straight or a flush, you may want to go for those since they have much higher returns.

If you succeed in winning a hand, you are given the option to double your winnings by trying to pick a higher card than the dealer shows on the next card turned over. This game is so easy to master that we are sure you will be playing (and winning) your own money in no time!

4-Line Jacks or Better - Online Casino Game

Why do people play card games? Because it is a fun way to pass the time with

friends, especially Video Poker games, develop social skills and learn the joy of success or how to deal with the crushing agony of defeat...Yeah, right!

People play to win cold, hard cash! With hundreds of games out there and so many ways to play and rules to follow, how does the average person ever get good enough to 'beat the system'?

First, you find yourself a simple, but lucrative game to play and then you play casually until you get the hang of it. It is probably best to start with something that doesn't have too many rules to keep track of but will offer you multiple ways to win a round.

How to Play 4-Line Jacks or Better Videopoker

In many other types of poker, there are so many rules to keep track of, wild cards to look out for and ways to deal the cards that your head can spin like a slot machine.

This incarnation of the age old game is much simpler and easy to master. In 4-Line Jacks or Better, the object is to put together a hand that has at least two face cards or any combo that would beat the same.

Your chances of doing this are good enough, but add another three rows and you have just quadrupled your odds of winning some cash on each hand.

The flow of this individual player game is easy to follow and fast paced so you aren't wasting any time waiting for other players to place bets.

You just set the denomination on your chips, choose how many to toss in the pot and then deal the cards. From the hand dealt, you can hold cards that you think are going to help you put together a winning hand.

Winning More Money with 4-Line Jacks or Better

If all of this wasn't already enough to grab your attention, there are still more ways to take home big money. Any time you win on any of the hands you are playing, you are given the option to either double or half-double your winnings.

You can do this by selecting the amount you are going for and dealing the cards again. This time, only one of the cards from the first row will be displayed. Once it is, you choose another card from the same row and try to beat the card that was revealed.

If you beat it, you win! If you aren't already an expert card shark at 4-Line Jacks or Better, you will be very soon!

10-Line Jacks or Better – Online Casino Game

For those of you who have previously played this game, we know you enjoyed the original one line version. Then, when the four line option came out, it quadrupled your chances at winning per hand and we are certain that it was that much more exciting for you.

If you loved both of those previous versions, then there is no question that 10-Line Jacks or Better will become your new favourite.

10 Times The Winnings With 10-Line Jacks or Better Video poker

There is no need to be concerned if the board seems a bit confusing at first because we have no doubt that soon enough you'll be raking in the dough.

While there are more lines to follow in 10-Line Jacks or Better and therefore a bit more attention might be needed, this style is just like its predecessors and you won't have to learn the rules from scratch.

The goal of this casino game is the same one to which you have already become accustomed – get any hand that beats a pair of 10's and you'll put yourself up on the board.

Knowing poker, you know that the better your hand is, the higher your payout will be but that's the minimum necessary to win any money in this game. It's just adding a bit of a challenge to the already exciting and challenging world of poker.

And what's special about this particular form of the game? Well, in each round instead of one potential winning hand you now have 10. You're right – that means 10 times the payouts (or at least the possibility for it, depending on just how good your poker face is).

How To Play 10-Line Jacks or Better

Like any other standard video poker game, in 10-Line Jacks or Better you'll start by choosing the value of the coins you'll be betting and then put down as many as you have the stomach for (from one to five) and get ready for the cards to be dealt.

Once the cards are dealt you will obviously want to keep an eye out for the high cards (faces through aces) since these are the pairs needed to jump start your winnings.

You then get to hold the cards you like which makes them held across all the lines, and you just click to deal your new cards and find out how much money you

get to take home.

If you're only playing for fun (meaning without betting any real money), there's no question you'll have a blast with this game but if you've got the stones to put some real money down, you'll be glued to the screen and the combination of excitement and cash winning opportunities will keep you coming back for more!

50-Line Jacks or Better

In any casino, poker is always one of the most popular games to play. This may be because most of us have been exposed to poker in one form or another from surprisingly young ages.

If you think about old spaghetti westerns, any scene in a saloon featured at least one poker game of some kind going on in the background. Sometimes the game stayed in the background and sometimes it was the vehicle for a good, old fashioned barroom brawl with people flying through windows and bullets zipping past.

50-Line Jacks or Better may be just as exciting without all of the flying furniture and broken glass.

Playing 50-Line Jacks or Better Videopoker

In this version of the classic game, the idea is to put together a hand that consists of at least a pair of face cards or anything else that would beat the same hand.

There are so many ways to win that you would stand a very good chance of cleaning up at even one hand while in 50-Line Jacks or Better your chances are even greater since you are playing so many hands on each turn.

One of the other advantages to this game is that it is so easy to learn and master; in no time at all you will feel like a regular card shark.

Like most types of video poker, you start by selecting the amount of your poker chip and then determining how many chips to play.

Once you are all set, go ahead and hit the deal button to start the hand. Although you can see all 50 hands, only one is dealt at first. From this initial hand, you select the cards you wish to hold and watch them appear in all of the hands on the board.

This means that you have that many more chance to win! If at first, this all seems a bit confusing, you have the option to try the game in practice mode until you are comfortable with the flow of things.

Don't forget that in between rounds, if you have won anything on your hands you have the option to double your winnings by playing a round of 'beat the card showing'.

Jacks or Better Multi-Hand

Even if you've never played a round of video poker before, we know that just the thought of it has your blood pumping and heart racing a bit more than usual.

And if you are a video poker aficionado, then your fingers are probably twitching as well, waiting for the chance to get going. Well nothing here is holding you back – so come on!

With Jacks or Better Multi-Hand, the easy game play will have you playing at expert level in no time and you'll end up having to buy some extra wallets to hold all the cash we'll be throwing your way.

No Risk In Free Play Mode

With the way Jacks or Better Multi-Hand is set up, it's suitable for anyone from beginners to advanced players.

Basically, you start the game with one line of play and then it's up to you whether or not you'd like to increase that number. If you want more of a challenge, you can keep adding more lines (up to 20); all you have to do is click on the button labeled "Hands" and you're good to go!

If you're at all concerned about the complications in playing multiple hands, no worries. Start out in free play mode without risking any of your own cash (just ours) and don't bet any of your own hard earned money until you are 100% ready for it.

The number of hands can be changed from one round to the next – just keep in mind that the more hands you play, the more of a chance you'll have to win, and the higher those winning payouts can be!

How To Play Jacks or Better Multi-Hand

Jacks or Better Multi-Hand starts out like any of the other styles of this game. You choose the denomination of your coin for betting purposes, and then how many of those coins you would actually like to bet.

Once you've done that, make sure that you have the correct number of lines activated for the round (correct meaning the number of lines you can handle) and then get started.

Don't forget that whichever cards you hold on one line are then held on all of the rest to increase your chances at winning and that pairs of 10's and under are not your friend in this game.

So unless you're headed towards a full house or a straight, focus on those royals and aces to make sure you come out ahead! Wait a second – why are you still here reading this when you could already be playing and making money? Get going!

Joker Poker Casino Game

Joker Poker is an exciting variation of online videopoker as it is played with a 52-card deck plus a Joker that acts as a wild card. The wild card provides you with an extra advantage which means that you will find some differences in the payout table.

A major difference lies in the fact that the lowest ranking hand in this game is a pair of Kings or better.

How to Play Joker Poker

To begin the game, place your bets and click on the Deal button on your screen. You will be dealt five cards and can choose the cards that you want to hold.

Cards that complete a ranking hand will automatically be held for you, as will

any wilds. Click on the Deal button once again and the cards you did not hold will be replaced to create a new five card poker hand.

You will be paid out for any wins. If you win, you will be given the option to collect your wins immediately or to gamble to double or half double them.

The computer will select a card from five facedown cards and you will need to select from the remaining cards. If your card ranks higher than the computer's card, your winnings will be doubled or half doubled. If your card ranks lower, your winnings will be lost for that round.

Megajacks - Video Poker Game

Megajacks is an exciting and unique online videopoker option that offers a mega jackpot. Based on the game of jacks you have the chance to win life-changing amounts of money when you bet the maximum in this game.

How to Play Megajacks

When you begin playing Megajacks you will need to place a bet by clicking on the Bet One or the Bet Max buttons. Be aware that unless you bet with the maximum number of coins you will not be eligible for the progressive jackpot.

Click on the cards you want to hold and then click on the Deal button again. The cards you did not hold will be replaced by new cards to create a new five-card poker hand.

Your hand will be assessed and you will be paid out for any winnings. If you achieve a royal flush while playing with the maximum number of coins, you will be awarded the progressive jackpot.

If you win, you will be able to collect your winnings immediately or to gamble your winnings in order to double or half double them.

The computer will select a card from five face-down cards and you will select another card. If your card ranks higher than the computer's card, your winnings will be doubled or half doubled. If your card ranks lower than the computer's card, you will lose your winnings for that round.

Video poker is also available for free

Play video poker for free or for real money at online casinos. Now that you have found this ebook edited by casinobillionaire.com, you can stop looking for the best video poker games and start playing them immediately.

Choose your favourite video poker game, place your bet and get the latest casino bonuses and prepare to experience the best online casino entertainment ever. Just to give you a little taste, here's a list of our most popular video poker games:

Jacks or better: it's basically the most common video poker game available today;

Tens or better: a video poker game in which Tens replace Jacks;

Deuces wild: a game in which every two is a Wild;

Bonus poker: a video poker game similar to Jacks or better but with higher payout percentages;

Double bonus: same as above, apart from the fact that here there's a bonus payout to a player that has four aces;

When you are playing video poker you are playing one of the best games in our casino. All video poker games have large potential payouts and some of the best odds of our casino. You will love the thrill involved, it's a promise.

Video poker: pure gaming satisfaction

When you are playing online video poker, you place your bet, cross your fingers and click on the "deal" button. Here comes the choice: you can decide whether you want to keep your cards or get rid of some of them to get new cards from the dealer.

Then, if the cards you end up with match the pay-schedule of the video poker game you are playing, you start earning money. The origins of video poker date back to the 70s, when the first PCs started to be produced.

Being easier to play than the average casino games, video poker games became particularly popular in the last three decades and are one of the most played games worldwide.

Video poker: learn some video poker tips

You have always been told that video poker is a game of luck. However, when it comes to playing video poker online your skills make such a big difference that you'd better learn the ropes before you even start playing.

Boot your skills: play video poker for free until you gain enough knowledge to beat the dealer. Also, understanding the pay table is advisable.

Sometimes you need to risk it: if you feel like gambling to double your wins, what you need to do is choose a card which is higher in value than the dealer's one. It's a bit risky, but often very rewarding. Video poker amateurs, open your ears!

Take your time: thinking helps a lot. Good decisions need to be made carefully.

Catch the Jack: a jack is a treasure, remember that!

Take that cash: paying hands can be tricky. If you want to be sure to get some money, don't always risk it - hold the hand!

Go for the Royal Flush: whenever you end up having at least four cards which could make a Royal Flush, you'd better risk the hand. Otherwise, you could regret it.

If you have a pair already, don't hold the kicker.

The online casinos recommended by www.casinobillionaire.com are proud to offer an excellent selection of video poker games that offer high-paced poker action and seamless gameplay.

Powered by Microgaming and other games studios, the games also feature slick graphics and animation, sound effects, advanced user interface and fantastic cash prizes to be won on every game.

Playing the games is fairly simple - you place your bet, cross your fingers and click on the "deal" button. You can then decide whether you want to keep your cards or get rid of some of them to get new cards from the dealer. Then, if the

cards you have match the payable, you win!

Online Video Poker Rules

As one of the easier poker games, online video poker offers a high dose of casino action, allowing you to put your skills to the test to see if you can beat the dealer. To help you improve your game, here are a few tips to keep in mind when playing these games:

Try the free play games until you gain enough knowledge to beat the dealer - you will also need to fully understand the payable before playing for cash

If you feel like gambling to double your wins, choose a card that is higher in value than the dealer's one - this risky move could pay off and result in a win.

Take your time when deciding on your next move, and don't make a snap decision without thinking things through.

Look out for Jacks as these are very valuable in poker games.

Paying hands can be tricky - if you're in it to win it, then taking a risk may not always be the best bet, and holding may be a better option.

Look out for the Royal Flush - whenever you end up having at least four cards which could make a Royal Flush, then play your hand
If you have a pair already, don't hold the kicker.

Free Video Poker games

Still not 100% sure how the games work? No worries - you can try the games before you play for cash, so that you can improve your skills and get the hang of how the games are played.

Look out for free video poker games at www.casinobillionaire.com that are available for instant-play - no-download, no-deposit required.

Remember, you will need to sign-up if you want to play for real cash prizes.
